

MELCOM ELECTRONICS LTD WORKING IN PARTNERSHIP WITH THE MET OFFICE

April 2016

MELCOM ELECTRONICS LTD is working in partnership with the MET OFFICE to supply satellite connectivity services for multiple organisational applications. The Met Office and Melcom devised a service which will be simple, manageable with a high availability SLA.

The Met Office will be using Melcom's Satellite Services based on KA-Band Technology at a Major UK Airport, Overseas locations and a Mobile Exhibition service. Each service will allow the Met Office to control, monitor and receive data of their assets in real-time, in addition to providing onsite personnel internet connectivity.

For value added service, Melcom are additionally delivering a bespoke training package that supports the Met Office's need for future quick deployment of systems to additional locations.

This builds on an existing successful relationship with Melcom being the supplier of the MDM6000 and EL940 Professional satellite modems from Newtec. This helped deliver the Met Office in house designed upgrade to the EUMETCast reception system within agreed timescales and budgets.

About Melcom:

Melcom Electronics Ltd are an independent, privately owned supplier of RF & Microwave components, sub-systems and services including Satellite Connectivity Solutions. Established for over 20 years and operating within the Satcom, Defence, Space and other markets, Melcom focus on finding the right solution for our customers from our broad portfolio.
