AFJ INSTRUMENTS SPECIALISE IN COST EFFECTIVE INSTRUMENTATION,  
COMPLYING WITH EMC, RF MONITORING AND PRODUCT SAFETY  
STANDARDS

- Competitively priced
- Industry Leader in high precision measurement testing
- Reliable Instrumentation
- Provide full compliance testing with International standards

**Digital EMI Receivers**  
(Conductive Emission)

Fully FFT digital EMI Receivers for measurement of conducted electromagnetic interference in accordance with requirements of EMI International, European and Product standards, pre-selectors and advanced software for EMC testing

[Full product range](#)

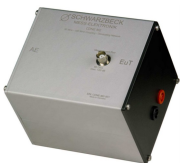

**EMC LISNs**  
(Conductive Emission)

LISNs (Line Impedance Stabilisation Networks) have been designed and developed for line-bound interference measurement

[Full product range](#)

**CDNs**  
(Conductive Emission)

CDNs (Coupling Decoupling Networks)for radiated emission measurements from 30MHz to 300MHz according to the requirements of CISPR 15 Ed. 6 / EN 55015 Ed. 6.

**DDA55+ Click Analyser**  
(Click Measurements)

DDA55+ is a Digital Click Analyser with four parallel channels having fixed frequencies (150kHz, 500kHz, 1.4MHz, 30MHz)
