## WEBINAR INVITE

### RECOMMENDATIONS FOR IMPROVING PULSE FIDELITY IN RF POWER AMPLIFIERS

Date: Wednesday, December 8, 2021

Time: 9:00 am PDT | 12:00 pm EDT | 18:00 pm CEST

Speaker: Scott Blum,  
RF Applications Engineer

**Wolfspeed** are offering a webinar to discuss how to design areas of a pulsed amplifier circuit to achieve a high degree of pulse fidelity. Also, what parts of the amplifier circuit help or hurt the pulse fidelity and how the parts of the amplifier circuit are best designed.

#### Attendees Will Learn:

- The important metrics in discussing pulse fidelity performance
- How pulse fidelity affects system performance
- What parts of the amplifier circuit help or hurt the pulse fidelity
- How the parts of the amplifier circuit are best designed
